## ENEOS Renewable Energy and Yamada Town Enter into Comprehensive Partnership Agreement on Renewable Energy Projects

ENEOS Renewable Energy Corporation (headquarters: Minato-ku, Tokyo; President and CEO: Yasushi Onoda) has entered into a comprehensive partnership agreement with Yamada Town, Shimohei District, Iwate Prefecture (Mayor: Shinitsu Sato) concerning renewable energy projects, and a signing ceremony was held at Yamada Town Hall on March 26.

Under this agreement, the parties will discuss the construction of new renewable energy power plants in Yamada Town and the use of generated electricity within the town and by local businesses for local production and local consumption. They will also consider initiatives for regional revitalization and contributions to the local community, as well as measures to strengthen resilience in the event of disasters.

Construction of the JRE Yamada Town Orikasa Area Solar Power Plant, the first renewable energy power plant to be developed under this initiative, has now been completed, with commercial operation scheduled to begin in April 2026. The power plant utilizes land owned by Yamada Town that had remained unused after being affected by the tsunami caused by the Great East Japan Earthquake on March 11, 2011.

ENEOS Renewable Energy will continue to deepen its collaboration with Yamada Town, promote the effective use of idle land, and actively consider and implement measures to contribute to the local community, thereby contributing to the sustainable development of both parties. Through its renewable energy power generation business, the Company will
